MESSAOUDENE MOHAMED

Full-Stack Developer | React.js | TypeScript | Laravel | Node.js

PROFILE

Full-Stack Developer with professional experience building and delivering production-ready web applications for international clients. Contributed to multiple projects including SaaS platforms, healthcare systems, business dashboards, landing pages, and custom management solutions using React.js, TypeScript, Laravel, and Node.js. Experienced in transforming business requirements and Figma designs into scalable, responsive, and high-performance applications. Focused on clean architecture, maintainable code, and delivering reliable digital products that provide real business value.

EXPERIENCE

Frontend Developer (Contract)

GamifierSA — Saudi Arabia (Remote) · April 2025 – May 2026

- Delivered multiple production-ready projects including landing pages, dashboards, and full-featured platforms — with NearClinic and Montasib as key examples serving Arabic and English-speaking users across Saudi Arabia
- Built fully responsive interfaces across all screen sizes, converting Figma designs into pixel-perfect UIs with smooth animations using Tailwind CSS and Material-UI
- Optimized API performance through React Query caching and request batching, improving load times and perceived speed across key user flows
- Developed reusable component libraries and consistent state management patterns adopted across the team, reducing development time on new features
- Participated in code reviews, bug fixing, performance improvements, and deployment preparation for production releases.

PROJECTS

NearClinic [[demo](#)]

Technologies: React.js, Tailwind CSS, TypeScript, React Query, i18n, REST APIs.

Developed a multilingual healthcare platform that enables patients to search for clinics, browse services, and book appointments online. Implemented English and Arabic language support with full RTL compatibility, built clinic profiles and appointment booking workflows, and developed management dashboards allowing clinic owners to manage doctors, services, schedules, and appointments. Integrated backend APIs for real-time data synchronization and appointment management.

Islamic Values Forum – Landing Page [[demo](#)]

Technologies: React.js, Tailwind CSS, TypeScript, Inertia.js, Laravel

Developed a responsive event platform for a national forum, showcasing speakers, workshops, schedules, and registration information. Converted Figma designs into production-ready interfaces with a strong focus on accessibility, responsiveness, and performance, while integrating frontend pages with a Laravel backend through Inertia.js to provide a seamless user experience.

ShareFiring Landing Page & Dashboard [[demo](#)]

Technologies: [React](#), [Tailwind CSS](#), [Inertia](#), [Laravel](#), [MySQL](#).

Delivered a complete freelance project including a modern marketing landing page and an interactive dashboard for managing content and users. Integrated responsive UI with Tailwind, dynamic routing via Inertia.js, and backend APIs in Laravel with MySQL database support.

Social Media Website [[demo](#)]

Technologies: [React.js](#), [Material-UI](#), [Node.js \(express.js\)](#), [PostgreSQL](#), [Sequelize](#).

Built a full-stack social networking platform featuring authentication, profile management, media uploads, posts, comments, and likes. Implemented session-based authentication and authorization, designed relational database models using PostgreSQL and Sequelize, and developed responsive interfaces with light and dark mode support to enhance the overall user experience.

SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, Material UI (MUI), Redux Toolkit, TanStack Query (React Query), React Hook Form, Inertia.js, Responsive Design, i18n (Multilingual Applications).
- **Backend:** Laravel, PHP, Node.js, Express.js, RESTful APIs, GraphQL, JWT Authentication, OAuth 2.0, Session-Based Authentication, Role-Based Access Control (RBAC), Payment Integration (Stripe, PayPal).
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis.
- **Tools:** Git, GitHub, Docker, Linux, Postman, Swagger, Figma.

EDUCATION

ICT Engineer

National Higher School of Telecommunications and Information and Communication Technologies

Oran, Algeria - Graduated: June 2025

Relevant Areas:

- Software Engineering
- Web Development
- Database Systems
- Computer Networks
- Telecommunications

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate (Professional Working Proficiency)
- **French:** Intermediate
